TO: Each Supervisor

FROM: Marvin J. Southard, D.S.W.
             Director of Mental Health

SUBJECT: **DEVELOPMENT OF AN INCUBATION PLAN
FOR MENTAL HEALTH AGENCIES**

On April 8, 2008, your Board instructed the Director of Mental Health to 1) report back to your Board regarding the possibility of establishing a program, pilot or otherwise, to "incubate" nonprofit organizations to build capacity within the Mental Health system and 2) work with the Chief Executive Office to identify funding that could be used to fund such a program.

In reviewing the potential for incubating new agencies, the Department has determined that an incubation program could be developed and could potentially be funded through one of the upcoming Mental Health Services Act (MHSA) plan, e.g., the Workforce Education and Training (WET), Prevention and Early Intervention (PEI), or the Innovation components of MHSA. In addition, the Department has identified three (3) potential groups of nonprofit agencies that could benefit from such a program: 1) nonprofit agencies that could offer mental health services under MHSA but who have failed to meet the minimum requirements for contracting with the Department; 2) nonprofit organizations that do not currently offer traditional mental health services but have an expressed interest in doing so; and 3) nonprofit organizations that are interested in offering nontraditional services, such as prevention, outreach, and stigma reduction.

Pending allocation of funding from a component of MHSA, the Department recommends a multi-faceted incubation program consisting of several elements, as further described below.

Training Academy

Development of the proposed training academy will require consideration of the differing needs of agencies in the categories listed above and recognition that agencies within each group may require different types of support. While the Department currently

"To Enrich Lives Through Effective And Caring Service"

provides technical assistance to agencies that have been unable to meet the minimum requirements to be placed on the MHSA master agreement list, a more formal assistance program would be appropriate.

Potential topics that could be included in the curriculum are outlined in Attachment A.

Resource References

The Office of AIDS Programs and Policy (OAPP) has an existing capacity building program that has published reference materials for community-based organizations. The Department proposes to work with OAPP to ascertain if the Department can utilize some of these existing materials and adapt them, as necessary, for the mental health system.

Technical Assistance - General

Some community-based agencies may lack the organizational capacity to meet County contract, financial and audit requirements even with training. As part of the incubation program, the Department would seek to enter into as-needed contracts with various nonprofit agencies that specialize in assisting smaller nonprofit agencies with specific administrative, financial and technical support, as well as providing tailored in-depth training on specific topics. Such contracts would allow the Department to engage an agency to develop and offer workshops on responding to Requests For Proposals (RFP) for programs under MHSA.

Technical Assistance – Mental Health Services

Agencies that wish to engage in the provision of traditional mental health services will likely require "mentorship" and/or sponsorship by an existing provider. As part of the incubation program, the Department proposes to do an RFP for the provision of these services and develop a contract separate from the legal entity agreement to specifically address these services.

Nontraditional Agencies

The Department will develop a separate RFP process that will qualify agencies to provide nontraditional mental health services, particularly for the areas of prevention and outreach. A separate RFP will allow the Department to ensure that minimum requirements are relevant to the type of services to be offered and do not include potential barriers associated with agencies that receive Medi-Cal revenue. A separate service contract will also be developed based on services that are not traditional mental health services and differ from consultant type services.

Conclusion

The Department will continue to determine the staffing and financial requirements for implementing the Incubation Program as part of the development of the proposed MHSA program.

If you have any questions, please contact me at (213) 738-4601, or your staff may contact Robin Kay, Ph.D., Acting Chief Deputy Director, at (213) 738-4108.
